Navigating your computer has never been more effortless – Logickeyboard's Large Print Keyboard is crafted to deliver a higher level of accessibility, making it an ideal choice for those with visual impairments and low vision. The large and boldly printed keys eliminate the challenges associated with traditional keyboards, allowing for a more comfortable and efficient typing experience.

This keyboard not only enhances the daily computing experience, but also becomes a vital tool for fostering active and productive engagement in community life. Whether you're in a professional setting or at home, this keyboard is a practical and empowering tool. Elevate your computing accessibility with the Large Print Logickeyboard – where clarity meets convenience, and technology becomes more inclusive.

Various colour combinations

Designed to accommodate individual needs, our Largeprint keyboards are available in various colour combinations, allowing users to choose a colour combination that resonates with their preferences. This keyboard is White on Black.

Wireless and Wired connectivity

The Titan keyboard offers dual connectivity, enabling you to effortlessly switch between wireless or wired connection with just a keystroke. It is designed and optimized for use with Mac OS, but can easily be connected to an iPad or iPhone as well, or to two Macs – one corded and another wirelessly – making it ideal to master two workstations.

Backlit and Battery powered

For the best adaptation to working in low-light environments the keys on Titan are backlit, and the illumination is dimmable in 5 levels. The Titan keyboard uses a long-lasting rechargeable lithium-ion battery for the wireless connectivity with state of the art battery life. If used without the backlight feature the Titan provides energy for months’ use before recharge is necessary.
