- Compatible with the entire Atomos range

Convert, Connect, Stream

Nexus bridges the Atomos world of professional recording and monitoring with popular streaming platforms such as YouTube, Twitch and OBS. Use your Atomos device for professional shoot setup and recording, then plug-in connect to simply convert the HDMI output to USB on the go for streaming on your Mac or PC. Nexus accepts up to 4K p30 video and is capable of up to 1080p60 output over USB – incredible streaming quality for the price point.

Plug and go like a pro

With a slim profile, Nexus is sleek enough to sit directly off your laptop or computer. No drivers are required and no power supply either, meaning it really is a simple matter of connecting your Atomos or HDMI device to your Mac or PC to start producing like a pro.

Transforms your Camera to a Pro Webcam

Even without an Atomos monitor-recorder, Nexus transforms your HDMI camera to a powerful professional webcam. No drivers required, plug in Nexus and go live instantly.

Simplify your shoots with no-fuss live streaming

Nexus works with any HDMI device, including the entire Atomos range. It's simple to use, has universal support from popular streaming platforms and is an affordable way for gamers, vloggers and education facilities to up their streaming game using the professional Atomos monitor-recorder ecosystem.
