

## BirdDog Cloud Data Pack

ProdCode: **BDCLPREMTURN50**

BirdDog Cloud - 50GB Data Pack - Premium

[Download Images] (.zip file)

### Features

- NDI remote delivery and management software
- Remote Production
- Connect any studio, anywhere
- Fully encrypted connections over the public internet
- Full PTZ control for all BirdDog and 3rd party NDI PTZ cameras
- Ultra low latency
- SRT enables the delivery of high-quality and secure, low-latency video across the public Internet

## **Control any production, anywhere**

Full PTZ control for all BirdDog and 3rd party NDI PTZ cameras.

## **Bridge NDI, SRT, and SDI workflows**

Ultra-low latency. Broadcast quality.

## **Apps. For Remote Production.**

Remote viewing in as little as 2 frames.  
PTZ camera control from your mobile device.

## **Connect any number of NDI or SDI sources to anywhere across the globe**

BirdDog Cloud 3.0, the next generation of BirdDog's globally connected advanced media platform, is the fastest and easiest way to expand outside your local network to distribute your content to anywhere in the world.

At its core Cloud 3.0 harnesses BirdDog's specialised transport engine, a highly reliable and scalable media pipeline, delivering all the benefits and security of SRT, augmented with deep control layers for PTZ and metadata, and multi camera synchronisation support.

- **Live Production**

Take any number of NDI® or SDI video sources in any location across the globe and make them available to your production with the magic of BirdDog Cloud. Control remote PTZ cameras via software, or with the tactile BirdDog PTZ controller, and adjust colours and camera settings in real-time with BirdDog Cam Control. All remotely in almost zero latency.

- **Post Production**

Intuitive and lightening fast remote editing workflows come to life with the award-winning, free Adobe panel for collaboration between directors, editors, and producers anywhere in the world. Producers can easily select their views interactively, instantly switching from timeline to confidence monitor to edit suite camera views, even with picture-in-picture overlays.

- **Bring your own Device**

Apple TV, Android TV, Samsung TV, iOS, and Android devices just went Pro. Cloud delivers new Cloud Apps for all these devices deeply integrating them

into your next media event.

Utilising Cloud Apps allows anyone to be in on the action in real-time, from a producer who wants input in a shoot, a director who wants to see all the action, or an event manager ensuring the run-sheet is on point.

- **Cloud Recorder**

With Cloud Recorder NDI® is able to be recorded at both the sender and receiver endpoints.

- **Transport**

Built in conjunction with Google, transport is a globally connected, secure delivery network designed for easy operation with BirdDog Cloud. Have your own network infrastructure? No worries we can accommodate.

- **API control**

New API support creates incredible opportunities to build global and scalable video workflows like never before.

- **Mobile App Audio Selection and Routing**

When in the game-changing Presenter Mode you can now switch in real-time which audio source you wish to monitor. Switch between microphone, mix-minus, program, or PC audio. The choice is yours.

- **DX. IT admins rejoice**

DX is BirdDog's revolutionary technology that easily navigates video over challenging corporate IT networks. No need for port-forwarding or firewall exceptions. DX retains end to end encryption and total security of the network. Did we just hear the IT admins popping corks?

- **More GPU support. M1 included**

Cloud ushers in a raft of new GPU accelerated processing including beefy Apple M1/M2 chips, nVidia, and Intel native acceleration. Making the fastest, highest quality, and most flexible remote production workflows.

## **Remote Editing - Collaboration for Adobe workflows**

Editor here. Director there. No worries.

### **As little as 2 frames latency**

Over the shoulder without being over the shoulder.

### **Choose your own layout - Timeline. Output. Timeline AND output**

The fastest remote editing tool on the planet, BirdDog's award-winning Adobe plugin gives unprecedented speed and flexibility to remote editing collaborations.

## **Apps. For Remote Editing**

Connect editors and directors via BirdDog Cloud and use the suite of Apps to collaborate with frame accuracy while in different locations.
