Full NDI. No compromises

P200 PTZ camera utilizes BirdDog's custom NDI® silicon chip and leverages an impressive Sony CMOS backlit sensor and full Sony Image Module.

Designed for serious production the image quality of P200 is best in class. Built on a true Sony Image module with Sony CMOS backlit sensor, P200 has super fast focus, incredibly sharp images, and amazingly fast zoom. P200 has frame rates up to 1080p60, 30x optical zoom, and outputs SDI, HDMI, and NDI® simultaneously. 3.5mm audio connectors allow P200 to work with BirdDog Comms, the world's first NDI audio intercom platform. Comms is a Windows 10 application that can run on any Windows 10 compatible computer, laptop, or surface for a touch screen experience.

P200 has been designed for the most demanding on image quality. The superior optics make P200 perfect for Sports, Broadcast, Live Event Production, IMAG, Education, and any other application where quality matters. P200 can also be used as a traditional PTZ camera with SDI, RS422, RS485, and RS232 control allowing you to move into the world of NDI® when you are ready.

FREE Cam Control. Colour match in seconds

The [Cam Control app](#) is the easiest and most user-friendly way to dial in BirdDog cameras. Simply load on a Windows 10 machine on the same network as your BirdDog cameras and access all functions of the camera through a beautiful interface. Quickly dial in the look you like and copy settings across multiple cameras in seconds. And it's 100% FREE with all BirdDog PTZ cameras.
