Features

- Electronic control unit
- Operates different speed ratio in the elevation
- Compatible with most of the high end PTZ from Panasonic, Canon and Sony

A new electronic control unit to bring your Lifto 25 to the next professional stage for automation, operates different speed ratio in the elevation.

The control Module is also capable of memorizing positions, starts, stops and repeat movements on demand or in loop.

The control Module is compatible with most of the high end PTZ from Panasonic, Canon and Sony, and interfaces with the main PTZ controller (Panasonic, Skarhoij).
