

## Cokin P-Series (M) Nuances Extreme Grad ND8 Full

**ProdCode: COKIN10901**

Full Graduated Neutral Density Filter ND8 (3 f/stops) in highly resistant mineral glass

[\[Download Images\]](#) (.zip file)

### Features

NUANCES Extreme filters are made of a highly resistant mineral glass, able to resist accidental fall and introducing innovative technology. A new coating process ensures an uniform density and a nano metallic alloy is applied on both side of a highly resistant tempered glass, resulting in a stunning neutrality. Nuances Extreme Full Graduated ND8 filter allows up to 3 f/stops of light compensation with a very long and uninterrupted transition ("full") from the top to the bottom of the filter. In this area, the light compensation is only 1 f/stop. This type of full transition refreshes the famous Cokin Creative P121F filter in CR39 resin, now with high-end optical characteristics due to the use of the NUANCES Extreme tempered mineral glass. Round corners and 2mm thickness makes Nuances Extreme filters easier to insert in extreme conditions. COKIN recommends the use of the EVO filter-holder in M size to ensure an efficient light-leaks protection with the NUANCES Extreme range of filters in M size.

- Full Graduated Neutral Density Filter ND8 (3 f/stops) in highly resistant mineral glass
- 3-Stop Graduated Neutral Density Filter
- Highly resistant mineral glass
- Nano-Metallic Alloy coating resulting in a stunning neutrality

**In the box:**

- Nuances Extreme glass filter
- Filter pouch
