

Cokin Special Adapter Ring For Nikkor Z 14-24mm F2,8 S

ProdCode: COKIN11958

Special adapter ring for the Nikkor Z 14-24mm F2,8 S lens

[\[Download Images\]](#) (.zip file)

Features

The Z4101 adapter ring allows you to use the Cokin NX-Series filter-holder with your Nikkor Z 14-24mm F2.8 S lens. The ring is precision machined in anodized aluminum and its design is optimized to reduce as much as possible the risk of vignetting and to get rid of a cumbersome filter-holder system of 150mm type. At the 14mm focal length, we can see a minimal vignetting in the corners of the image, which can be easily removed when developing the raw NEF file with an image processing software such as Lightroom. With this Adobe software, we recommend ignoring the built-in lens profile of your Nikon Z hybrid camera and selecting the correction profile of the old Nikon AF-S NIKKOR 14-24mm f/2.8G ED zoom lens in the "Lens Corrections" development menu. A final manual vignetting correction is then possible, depending on the needs of your images.

- A special adapter ring for the Nikkor Z 14-24mm F2,8 S lens and only compatible with the Cokin NX-Series filter-holder
- Size: L (système Z-Pro)
- Diameter: 101mm
- Weight: 40g
- Compatibility (Lens): Nikkor Z 14-24mm F2,8 S
- Compatibility (Cokin Filter-Holder): NX-Series 100mm

- Thickness: 16mm
- Protection: built-in foam ring to protect the lens
- Tightening Screw: knurled and rubber-tipped
