8-Channel 4K Live Switching

Experience broadcast-grade UHD 4K50/60P quality with the MS-4000's 12G-SDI and HDMI 2.0 input interfaces. The device combines physical full-function buttons with a sleek 5-inch full-color LCD touchscreen. Key features include quad split composition, XPT (Cross Point), AUX output, special effects transitions, PiP (Picture-in-Picture) caption overlays, logo insertion, and audio mixing settings.

[ITC-300](#)

New Digital Intercom Function

Stay connected with the reliable wired digital intercom system, offering 8 channels of clear, noise-free communication. No more worries about interference or disconnections, ensuring smooth operation during live productions.

[TLM-170K](#)

4K UHD 17.3-inch LCD Monitoring

Monitor your production in stunning detail with the high-quality 3840 x 2160 resolution LCD screen. The 17.3-inch display supports 12G-SDI and HDMI 2.0 loop inputs and outputs, making it ideal for broadcast and live production applications.

[HDR-90](#)

ProRes 4K Recording Function

Capture every moment in ultra-high definition with the ProRes 4K recording capability, supporting 2160p 60 resolution. The MS-4000 can record multiple 1080p video streams simultaneously, ensuring you never miss a detail.

[AD-300](#)

Professional Audio Delay Function with Mixing, Equalizer, and Audio Effects

Processing

Achieve professional audio quality with the MS-4000's extensive input/output interfaces and audio effects processing capabilities. Features include audio delay, mixing, equalizer, and audio effects processing to meet all your production needs.

[PD-4A](#)

Dual Power Supply Center

Ensure stable operation with the dual power supply feature, providing redundancy and reliability for continuous production without interruptions.

NVS-36

H.265/H.264 Encoding Capability

Expand your production capabilities with H.265/H.264 encoding for high-quality recording and streaming. Ideal for live events, the MS-4000's NVS-36 supports extended applications for encoding, recording, and streaming in mixed production environments.
