#### **Features**

- Portable Conference Teleprompter
- Stand-alone, Free Adjustment
- Clear Display for Any Situation
- Easy to Carry and Durable
- Built in Teleprompter Application
- Easy Control and Monitoring via Ethernet
- Synchronize Multiple Units via HDMI or IP

## The Best Prompter for Conference

The Datavideo TP-800 MARK II teleprompter stands out as the premier choice for conferences, offering unparalleled functionality and ease of use.

The TP-800 MARK II conference teleprompter kit is designed for corporate conferences or other events where a speaker is addressing an audience. From the audience's perspective, the high-quality prompter glass is transparent, giving the impression that the presenter is speaking fluently and professionally without any assistance. From the presenter perspective, the glass displays a mirror image of the pre-prepared speech from the LCD monitor at the base of the stand.

## Stand-alone, Free Adjustment

TP-800 MARK II is both easy to set up and easy to operate. Once set up, the TP-800 MARK II can stand completely on its own and can be freely adjusted in height and viewing angle.

# Allowing Performers to Focus on Their Best Performance and Ensure the Event Runs Smoothly

TP-800 MARK II uses high quality mirror-reflective glass, which looks like an ordinary piece of clear glass from the audience's perspective, but perfectly reflects the prepared script displayed on the LCD screen below the Teleprompter.

## **Clear Display for Any Situation**

With a hood, the strong light effect of the surrounding environment can be avoided, always maintain a clear script display.

Optionally, the top case of the teleprompter is easily removable for convenient access.

## **Easy to Carry and Durable**

All components housed in a sturdy, portable case that can be set up in just a few minutes. Supports mains or V-Lock battery power.

# **Built in Teleprompter Application**

The TP-800 MARK II features a bright 15" 4:3 LCD screen with the powerful dvPrompter Plus application built in, there is no need to run software on a laptop.

## **Easy Control and Monitoring via Ethernet**

Control and monitor the prompter over a local network using any device with a modern web browser, Load, reload and control scripts over a local network.

## Synchronize Multiple Units via HDMI or IP

Connect multiple TP-800 MARK II together using the HDMI input and output or use IP synchronisation over Ethernet.

The HDMI input also allows the 15" LCD screen to be used as a HDMI monitor with third party software if required. The HDMI output can also be used to drive external displays.

#### **Powerful Rich Text Editor**

You can remotely change the font size, type, colour and justification on a per script basis and even use multiple different fonts within a single script.

The editor also has support for embedding images and creating playlists from multiple scripts.

## Supports PowerPoint and Keynote slides\*

In addition to text-based scripts you can now import your Powerpoint or Keynote presentation slides via the web interface, slides can be controlled using the hardware WR-500 control or the web based remote control interface. dvPrompter Plus supports seamlessly switching between text-based scripts and slides, you can even add slides and text-based scripts to a playlist.

dvPrompter Plus supports mirroring slides in real time so your content is the right way around even when viewed via the mirror glass.

## **Real Time Editing\***

Interrupt live broadcasts with breaking news or urgent updates, simply modify the script via the web interface and watch it update in real time.

# **HDMI Input**

In addition to having the powerful dvPrompter Plus application built in, the TP-800 MARK II also features a HDMI input port with hardware mirroring allowing you to integrate the hardware with any third-party software, you can even use the HDMI input as part of a playlist.

## **Optional Hardware Controllers**

The TP-800 MARK II can also be controlled using our WR-500 handheld remote, FS-30 Foot Pedal or any generic presentation remote with a USB receiver. Optionally you can connect the Contour Shuttle Xpress to the IP connected computer for even more subtle control.
