

Datavideo VP-901

ProdCode: DATAVP901

12G-SDI Distribution Amplifier

[\[Download Images\]](#) (.zip file)

Features

- 12G SDI Distribution Amplifier
- Distribute a single 12G, 4K, HD, or SD-SDI input into eight SDI outputs
- Splits an SDI, HD-SDI, 3G-SDI, 6G-SDI, or 12G-SDI video source to SDI compliant video displays simultaneously
- Supports re-clocking for a clean signal over long cable runs
- Supports 12G/6G/3G/HD/SD-SDI video with embedded Audio
- LED indication of signal lock and video rate
- Plug & Play - Automatic detection of incoming data rate

VP-901 1x8 12G SDI Distribution Amplifier

The VP-901 12G SDI Distribution Amplifier can distribute a single 12G, 4K, HD, or SD-SDI input into eight SDI outputs. It is a reliable video device, which splits an SDI, HD-SDI, 3G-SDI, 6G-SDI, or 12G-SDI video source to SDI compliant video displays simultaneously. It also supports re-clocking for a clean signal over long cable runs.

Useful applications in digital signage, indoor, and outdoor studios

Supports 12G/6G/3G/HD/SD-SDI video with embedded Audio.

Equalization and re-clocking

To provide better performance on video and reduce the accumulated jitter problem

LED indication of signal lock and video rate

With easy-to-use controls, the VP-901 is ideal for a variety of broadcast, post-production, and professional AV applications.

Plug & Play

Automatic detection of incoming data rate.

In the box:

- 1x VP-901
- 1x AD Switch DC 12V
