Mounting bar and holder for Tilta Nucleus M motor

[\[Download Images\]](#) (.zip file)

Features

- Mounting bar and holder for Tilta Nucleus M motor
- Converts a manual Zoom camera into a Robotic Pan Tilt Zoom remote control camera using PTR-10 MARK II

ZEK-2 Zoom Encoder Kit is a mechanical device that allows you to mount the Tilta Nucleus-M motor which adds automatic zoom positioning to the Panasonic Lumix BGH-1 camcorder mounted on the PTR-10/10T MARK II Robotic Pan Tilt Head.

Professional Pan Tilt Zoom Control

Convert a manual Zoom camera into a Robotic Pan Tilt Zoom remote control camera. Through standard LanC protocol, PTR-10(T) MARK II can control the Focus and IRIS of the M4/3 Lens mounted on Lumix BGH-1. With the help of the Tilta Nucleus-M Motor Kit, we can also control the Zoom function of this camera. Even to recall the pre-stored zoom position.

ZEK-2 is the Solution to Your Free Running Zoom Cinema Cameras

Through standard LanC protocol, PTR-10(T) MARK II can control the Focus and IRIS of the M4/3 Lens mounted on Lumix BGH-1. With the help of the Tilta Nucleus-M Motor Kit, we can also control the Zoom function of this camera.
