- Weight: 410 g | 14.46 oz without stand

Extra Large for Extra Control

Stream Deck XL puts even more creative power at your fingertips. Meaning you get more studio-level control to optimize your content. More access to time-saving integrations. More scope to boost your production value. More of everything that keeps your stream fresh, and your audience hooked.

Sets the Benchmark Even Higher

An expanded 8x4 grid provides a grand total of 32 LCD keys, each sporting crisp resolution and fluid playback. Easily customize them all with static or dynamic icons. Enjoy one-touch tactile control like never before. Get instant visual feedback to confirm your every command. And tap with confidence thanks to a non-slip magnetic stand that holds solid at the perfect angle.

Your Streaming Centerpiece

Start streaming. Adjust audio levels and mute your mic. Tweak lighting. Switch cameras. Apply lower thirds. Change scenes. Activate your intermission screen. Trigger onscreen videos, images, GIFs and soundbites. And wrap up with your signature outro. When it comes to advanced live production, Stream Deck XL gives you supreme creative control.

Seamlessly Integrated

Elgato Game Capture, OBS, Streamlabs, Twitch, YouTube, Twitter, Mixer, and more. Stream Deck XL integrates your tools and automatically detects your scenes, media, and audio sources. So you can directly orchestrate your stream on the fly. And engage your social networks at the perfect moment.

Works with Your Entire System

Hotkey actions make keyboard shortcuts so last century. Now, you launch apps and websites, open folders, access pre-composed texts – even streamline your video editing, graphic design, or audio production workflow – without second guessing. Because you know exactly where your macros are, and they've never looked better.

Completely Customizable

Personalizing Stream Deck XL is a breeze. Simply drag and drop actions onto keys,

and assign ready-made icons or use your own. 32 not enough? Turn keys into folders to amass as many actions as you want.

Knows What You Need

One moment you're live and the next, editing a clip, recording a promo, and marketing your channel. Create unlimited Smart Profiles with different key layouts for different tasks, and switch them up as you power through your workflow. Or set Stream Deck XL to automatically switch key layouts for you.

Trigger Chain Reactions

Why tap multiple keys – to start your intro scene, tweet that you're live, and post a welcome message to your chat – when one will do it all? That's right. Assign unlimited actions to a single key and launch them all with a tap. One by one separated by intervals. Or together, simultaneously.

Never Stops Evolving

Spotify, Philips Hue, NVIDIA Share, VoiceMod – thanks to Stream Deck SDK, new integrations just keep coming. Stream Deck just keeps getting better. And with everyone in on the action, anything is possible.
