Features

- Hands-free control of your apps and tools
- Sturdy, customizable and discreet
- Grippy surface
- Heavy-duty chassis
- Anti-skid feet
- Assign macros to pedals for instant deployment without error
- Easy setup

Step up your studio power

Sturdy, customizable and discreet, Stream Deck Pedal gives you instant hands-free control of your apps and tools.

Tactile Control. At your feet.

Three pedals poised to launch unlimited actions. One-touch operation to control software, hardware, and much more. It's like having a personal studio producer.

Stay in the game

Your fingers are dedicated controller smashers. They don't have time to mute your mic, trigger censor bleeps or launch your victory meme. But your feet do. Put them to work on your stream so you can focus on your game.

Step away from your computer

Jamming, cooking, or unboxing while switching scenes and triggering effects is tricky. Stream Deck Pedal makes it easy. Go live, toggle cameras and more, without reaching for your PC.

Trigger chain reactions

With Multi Actions, any number of actions can be strung together, assigned to one pedal, and triggered intermittently or all at once. Snap a screenshot, open a destination folder, and launch Twitter for quick sharing. Or change scenes, play a track, and cue your voice changer – with one tap.

Hotkey Actions

Assign macros to pedals for instant deployment without error. Streamline your video editing, music production or photography workflow. Your options are endless.

Different key profiles

- **Discord Chat**
Toggle Mute, Push-to-Talk, Deafen, and more. No keyboard or mouse necessary.
- **Content Creation**

Easily control audio, video, and chat without touching your computer.

- **Gaming**

Say goodbye to memorizing keyboard shortcuts, and trigger gameplay actions faster than ever.

- **Presentations**

Remain focussed on your audience while you control slides, toggle cameras, mute your mic, and more.

- **Video editing**

Got mad finger skills? Add feet to your repertoire and blaze through projects.

Only three actions? Think again.

Smart Profiles allow you to create unique pedal layouts that load automatically when switching apps. Picture one for live streaming, another for video conferencing, and a bunch more for your workflow tools. All your actions, instantly at your feet.

Want to change pedal layouts manually?

Use another Stream Deck or select Corsair keyboards.

Set up with ease

Simply drag actions onto pedals in the Stream Deck application, and you're done.

Put your foot down

Stream Deck Pedal is built to take a stomping without budging. For optimal comfort and ease of use, interchangeable springs let you adjust the tension of each pedal.

In the box:

- Stream Deck Pedal
- Spring Tension Customisation Sets
- USB-C to USB-A Cable
- Quick Start Guide
