- Capture PC, PS5, Xbox Series X, Switch, Steam Deck, Mac, iPhone 15, etc.
- Capture to multiple apps at the same time
- Works with OBS, Streamlabs, Twitch Studio, Restream, Zoom, Teams, and more
- Stream to YouTube, Twitch, Discord, Facebook Gaming, etc.
- Easy setup on Windows PC

8K60 passthrough, 4K60 capture! VRR and true 10-bit HDR. 4K Pro turns your high-end PC or dual PC setup into the ultimate streaming machine, and leaves your gameplay alone. Equipped with HDMI 2.1, you can even play in high resolutions at high frame rates, like 4K240, and capture ultra-smooth 1080p240 footage of your performance – all while ultra-low latency circuitry keeps your gameplay and capture feed perfectly synced. From PC, PS5, and Xbox Series X to Nintendo Switch, Steam Deck, ROG Ally, even iPhone 15 – we've made sure 4K Pro plays beautifully with your beloved machine. Because you've invested in high-end gear for the best gaming experience possible, and you shouldn't have to compromise that.

In the box:

- Game Capture 4K Pro
- 8K HDMI cable (200 cm | 78.7 in)
