

Elgato XLR Dock for Stream Deck +

ProdCode: ELG10GBM9901

XLR-to-USB Mic Interface

[\[Download Images\]](#) (.zip file)

Features

- XLR-to-USB Mic Interface
- Connect your XLR microphone to a computer via Stream Deck +
- Dynamic mics sound loud and clear with up to 75 dB of gain
- Brings condenser mics to life with 48 V of phantom power
- With Clipguard technology, get loud without fear of distortion
- Fits neatly behind Stream Deck + to keep your workspace clear
- Mix, monitor, and control all your audio from a single device
- Customize keys and dials to fit all your audio workflows
- Assemble in minutes using only a screwdriver and two screws

Two become one. With XLR Dock, plug your high-end microphone into Stream Deck +. It's an audio interface that slots directly in behind your controller to free up desk space. Inside, a preamp boosts dynamic mics with up to 75 dB of ultra-low-noise gain. Condenser microphones come to life with 48-V phantom power, while Clipguard keeps you sounding smooth even when things get loud. Stream Deck + and XLR Dock bring all your audio controls together—not just hardware, but also your apps like Spotify or Discord. So you can mix, monitor, and do just about anything from a single device.
