

HOYA 62mm POLARIZING

ProdCode: HOY0545

Linear Polariser Filter - For manual focus cameras - 62mm

[\[Download Images\]](#) (.zip file)

Features

- Recommended for manual focus cameras only.
- Available in sizes from 40.5mm to 82mm diameter

Light rays which are reflected by any surface become polarised and polarising filters are used to select which light rays enter your camera lens. PL (Linear Polarising) and PL-CIR (Circular Polarising) filters have the same effect, but it is important that you choose the correct version for your camera. They allow you to remove unwanted reflections from non-metallic surfaces such as water, glass etc. They also enable colours to become more saturated and appear clearer, with better contrast. This effect is often used to increase the contrast and saturation in blue skies and white clouds. HOYA's polarising filters do not affect the overall colour balance of a shot.

In the box:

- Polarising filter
- protective case
