- EI-7004B Dolly w/ Locking Wheels and Cable Guard
- Fine-Tuning for Counterbalance
- Includes Two GB4 Extendable Pan Handles
- Includes T30 Carrying Bag for Pedestal Legs

Transport your camera around the set or studio smoothly and quickly with this Air-Assist Pedestal with Height-Adjustment Lever from E-Image. This pedestal is made up of the heavy-duty GH20 fluid head, the AT7903A tripod pedestal, the EI-7004B tripod dolly, two padded panhandles, and a carrying bag for the pedestal legs.

GH20 Fluid Head

The GH20 head features a 100mm bowl and a nine-position counterbalance system. The head comes with a large, studio-style, quick-release mounting plate that helps to balance large studio cameras or teleprompters. It features two rosettes where you can connect the two included padded panhandles. The mounting plate also has a 6" slide range. The fluid head also features individual locks for both pan & tilt.

AT7903A Pedestal

The pedestal tripod legs feature a flip-lock leg design as well as an adjustment lever, which allows you to quickly adjust the pedestal height from 46.2" to 78". The "air-assist" center column has a dampening function that helps with the movement of heavy loads. The EI-7004B dolly features three locking rubber wheels, a load capacity of 132.3 lb, and a 39.4" footprint diameter, and it can be removed from the legs and folded for transport and storage.

EI-7004B Dolly

The E-Image Pedestal Dolly supports up to 132.3 pounds and is ideal for moving tripods along a flat surface for quick repositioning between shots. The cable guards keep your cables from getting tangled in the wheels. Once removed from the tripod legs, it folds easily for storage or transport. This dolly is perfect for both studio and location use where support for heavy setups is a requirement.

In the box:

- 1x GH20 Fluid Head
- 1x AT7903 Pedestal
- 1x EI-7004B Dolly
- 2x GB4 Pan Handles
- 1x T30 Carrying Bag
