[\[Download Images\]](#) (.zip file)

Features

- Helia 70 Watt 4 in. Fresnel Daylight LED Studio Light w/ DMX
- 4" Fresnel
- Daylight 5600K
- High CRI and TLCI
- 600 watts equivalency
- 28 to 70 Degree Beam Angle
- DMX512 In and Out (5 Pin)
- Barn Doors Included
- Gel Frame Holder Included

The Helia HF70 is a versatile Fresnel light. With a 70W daylight output packed into a compact 4" frame, the Helia HF70 is your ideal choice for adaptable and precise illumination. This light fixture comes equipped with a 4-leaf barn door for enhanced light control, a gel frame for effortless colour customization, and the flexibility of on-device control or advanced DMX512 functionality. Illuminate your creative space with the Helia HF70, where power, precision, and control seamlessly converge for an exceptional lighting experience.

Beam Angle

The HF70's 28 to 70 degree beam angle can easily shift from flood to spot, making it very helpful in any production. The light can be substituted for a 600 watt hot light.

Included Accessories

The 4 inch Fresnel comes with barn doors and a gel frame to help you get the look that you want.

DMX In and Out

The DMX 5-pin XLR in and out connectors give you better control over the light.

In the box:

- 1x 4" Fresnel Light
- 1x Barn Doors
- 1x Gel Frame
- 1x Power Cord
