[\[Download Images\]](#) (.zip file)

Features

- Optical glass with multi-layer coating for high light transmission and sharp, clear images
- Lens construction: 3 elements in 3 groups
- Lens body and clip made from aircraft grade aluminium (strong and light)
- Lens dimensions: 26 x 14.8mm
- Attachment clip is spring-loaded and compatible with devices up to 30mm thick
- Clip has special stabilisation plate and silicon pad that provides stable and firm attachment
- Clip comes with removable metal chain, so you can keep it always at hand on a bag etc.
- Compatible with most smartphones, tablets, laptops and many monitors (up to 30mm thick)

Kenko's REAL PRO 0.4x SUPER WIDE LENS is a high quality optical lens, designed for clip-on attachment to smartphones, tablets, laptops and even monitors which have a built-in camera. It increases the angle of view up to 165° by reducing the focal length of the original lens by 0.4x. This turns a standard lens into a super wide-angle to capture vastly more of a scene, such as a building or landscape.

In the box:

- Lens
- Lens caps
- Attachment clip
- Cleaning cloth
- Pouch case
