Additional points of camera contact have been added to the left side strap slot, anti-twist pin on the bottom of the camera, and the all-new cage Mid Rail ensuring a solid hold
- **Built-in Tools**
2mm & 4mm tools necessary for cage assembly and adjustment of the Ronin Arca plate are magnetically attached to the Base Plate
- **Over 15 Threaded Holes**
¼ and ½ and M4
- Easy Accessibility for Buttons, Dials, Cable Ports, and Battery/Card Doors
- Designed to protect the camera from the most common drop angles.
Strategically placed Mid-Rail for additional support for larger rig built outs
- **Perfect Balance**

Designed to maintain ideal center of gravity with most lens sizes for effortlessly maneuverability from top handle

- Wide strap loops for a side grip strap and/or a camera strap
- Compatible with Drop In Filter Systems such as Revolva, Breakthrough and Canon

The Canon 5 & R lines have always been incredibly popular. The Canon R5C is no exception and it seamlessly bridges the hybrid photo/video model in one compact package. The goal with any cage we produce is to magnify and enhance features of the camera without interfering with any of their intended functionality. That's why we specifically designed a specialized cage for this new camera.

Canon, as well as many other brands, have developed a unique set of adapters and filter systems to be used with the RF mount. The issue many cages on the market currently face is with their Left Side rails. The rail is often too far forward causing interference with drop-in filters. We intentionally avoided that area altogether while adding in a simple solution for the HDMI Micro and USB C bracket.

Being part of the Canon Cinema line is not as simple as adding a red C to the camera body. To honor the cinematic nature of this 8k beast, we've added key details such as a Sensor Plane Marker for accurately measuring focus marks when using manual lenses. The sensor height is also 85mm from the 15mm rods in our Base and Ultimate Rig Bundle options for seamless integration with professional matte boxes.

The Canon R5C cage is built for versatility and ease of use for productions of any size. Be sure to explore all of the Kondor Blue ecosystem as it will further enhance all of the features of this one-of-a-kind cage.
