- Reinforced PVC Connectors
- Weight: 1 oz
- Length: 14"-24"
- Thickness: OD 3.75mm

This Coiled D-Tap power cable will feed a regulated 19.5V through its DC barrel to allow more flexibility in Camera Setups. These cables are perfect for your Sony FX6 or FX9 Cameras. Whether you are rigging your camera to a Gimbal, shoulder mount, or building out a custom cinema rig this cable will provide ultimate versatility and always deliver reliable power. It is available in 10" and 30" lengths and is reinforced with metal connectors and nylon braiding.

This cable also features our new Smart D-Tap technology. If everything is plugged in and functioning properly the built-in indicator light will be blue or green. If it isn't, and something is wrong, the light will turn red, indicating an issue. When this happens, power is cut off immediately preventing any damage from occurring to sensitive electronics.
