

## Kondor Blue Director's Monitor Indie Kit

ProdCode: KONDMIKBK

Director's Monitor Indie Kit - Raven Black

[\[Download Images\]](#) (.zip file)

### Features

- Director's Monitor Indie Kit
- Lightweight, compact footprint
- Nato connection to monitor for quick release
- Dual 15mm rod clamp to prevent monitor sag
- Multiple accessory mounts
  - Cold Shoe
  - 4x Arri mount
  - Male Arri mount to mount into accessories like the Kondor Blue D-Tap Hub
  - 4x 1/4 20's
- Built-in 3mm and 4mm hex tools

The Director's Monitor Rig Indie Kit builds upon the foundation of the Kondor Blue Director's Monitor V-Mount kit. The 3.5" Monitor Cage Rail can be mounted to the top or bottom of your monitor. Then the Core Bracket can be attached via the nato clamp. Branching out from the Core Bracket is our 12" PPSH 15mm rod capped with a pair of Kondor Blue Hand Grips for 15mm rods. The 15mm rod mount on the Core Bracket features a unique dual clamping mechanism to prevent the monitor from slipping under its own weight.

Additional mounting points can be found throughout the monitor rig. The cold shoe on the Core Bracket is a great spot for a wireless receiver, and the retractable Arri pins are ideally positioned to work in conjunction with the newly designed Kondor Blue D-Tap Hub. The  $\frac{1}{4}$ " 20 threads on the bottom of the hand grips are ideal for  $\frac{1}{4}$ " Loop Screws for Straps, and of course mounting points throughout for our Mondo Ties cable management.

Every component of the V-Mount Battery Plate is machined to ensure durability and accuracy—you can confidently set the Indie Kit down without fear of the V-Mount popping off.

The modular design of the Indie Monitor Rig Kit allows for a variety of setups and accessorizing. We can't wait to see how it will be used on sets all over the world.

**In the box:**

- 3.5" Monitor Cage Rail
- Core Bracket
- Mini V Plate
- 12" PPSH 15mm Rod
- Pair of Rod Hand Grips for 15mm Rods
