- KONDOR BLUE signature Mid-Rail, bubble level, and sensor plane marker
- Integrated HDMI clamp
- Removable USB C clamp
- Angled cold shoe
- Weight: 250g/8.8 oz
- Dimensions: 157.5mm W x 110mm T x 62.5mm D

Speed, strength, and sleekness. When creating the cage for the Fujifilm X-H2S it needed to anchor the design on those three pillars. The cage leverages KONDOR BLUE's brand-new Hatch System which is a completely unique way to mount your camera cage with as few bolts as possible while remaining rock solid. The KONDOR BLUE Mid-Rail and eyelet inserts provide unparalleled structure and rigidity to the camera and now only require 4 bolts to fully assemble/remove the cage.

The Fujifilm X-H2S cage comes fully prepped to install out of the box. Users mount the cage by swinging the pivoting Bottom Plate 180°, then setting the cage on top of the camera while sliding in the eyelet connectors, and swinging the Bottom Plate back into place. This has allowed us to design the cage to be even more form fitting and dramatically speeds up installation and cage removal times. Best of all, all bolts necessary to remove the cage are clearly marked with arrow engravings.

Beyond the new assembly style, the Fujifilm X-H2S cage includes all of the pro features you've come to expect from KONDOR BLUE. Including the NATO rail on the Side and Top Plates, stainless steel ARRI style rosette, ARRI style anti-twist mounts (1/4 20 and ? 16), USB C clamp, built-in tools for assembly, angled cold shoe, and our signature bubble level.

This Fujifilm X-H2S cage and base rig are ready to rock and roll for productions of any size. Each piece is precision machined from durable 6061 aluminium and anodized in Space Gray or Raven Black. Be sure to check out all of the essential accessories to take the Fujifilm X-H2S cage to the next level.
