- 135g/4.75 oz
- 140.5mm W x 34mm T x 34mm D

The all-new Hand Grip Pro for 15mm Rods is a powerhouse grip with loads of functionality. The cylindrical grip emits the bike-style grip operators have grown to love while incorporating key enhancements to improve ergonomics and functionality for filmmaking use. The tapered cut-ins make the grip pocket into hands of any size, all while the top slope provides a stop so your hands don't slip. The KONDOR BLUE logo also provides a pragmatic tactile solution for increased traction. The rounding on the bottom of the grip serves as another comfortable hand position for operations holding the grips from the bottom.

Made from the same beloved rubber blend as the KONDOR BLUE Talon and Wing Handles, the grips are flexible, yet firm. In addition to comfort, the Hand Grip Pro has integrated anti-twist mounts on the front and bottom of the handle. Dual strap loops are also machined in for use with side handle straps on either the right or left side; a ¼" Loop for Straps can be used with the included ½" to ¼" bushing to complete the setup.

Camera operators and assistants can set rigs down on any surface worry-free knowing that the rubber grip is the lowest point of contact on the handle. This not only provides anti-slip security, but keeps surfaces mar-free.

Feature rich yet intuitive, robust yet lightweight—the KONDOR BLUE Hand Grip Pro for 15mm Rod is a great asset to have on hand for a variety of builds from shoulder rigs to director's monitors, let your creativity soar.
