Features

Using the ARRI-style 8mm 4-post system, the KONDOR Blue Single Stage is an easy add-on to any of the KONDOR Blue Matte Box System kits. All adjustment knobs are captive and toolless. The Single Stage is also compatible with the ARRI LMB system. You'll appreciate all of the care taken at every detail to make the Single Stage an exceptional piece of hardware. Features include a pivoting magnetic filter catch, a magnetic filter tag, and a premium filter tray.

- ND & DIFF Magnetic filter tag included
- 2x Pivoting magnetic filter catch
- Weight: 240g/8.5 oz
- Dimensions: 172mm x 115mm x 9.4mm (W x T x D)

The KONDOR Blue 4x5 Matte Box System represents the next generation of what a matte box should be expected to do. It can scale up or down to fit any creator's needs and project requirements.

By beginning with the pro-level standard of the ARRI LMB, we matched their 4-post mounting standard but made the system even more adaptable to various stages and mounting plates. From there, we implemented critical safety features such as pivoting filter catches, a safety snake loop, and a magnetically nesting carbon top flag. We then added quality-of-life features such as line bubble level, top flag tension and tilt controls, and knurled knobs for easy adjustment with the comfort of integrated o-rings. All adjustment knobs are captively contained for peace of mind and ease of use.

The KONDOR Blue MBS holds up to 4 4x5.65" (2-4mm thick) filters. From the Ultimate to the Base Kit and any combo in between, the KB MBS can also be configured to any level of production, budget, or shooting style. This level of adaptability within this price point is unprecedented. Made from premium materials throughout, the KONDOR Blue 4x5 Matte Box System is in a league of its own.
