- Pivoting clamp with 8x ways it can be mounted
- Power input range 9V-18V 10A
- LED power indicator

The KONDOR BLUE V-Mount Pro Battery Plate offers a long list of features to fit the Pro name. Loaded with a range of power output ports, the plate also features 2x USB C PD ports which are both capable of power output/input. On top of the plate are magnetic power contacts for KONDOR BLUE Expansion Modules.

The plate body is fully machined out of aluminum. The back of the plate features 4x ARRI-style anti-twist mounts with additional M4 mounts to connect the Battery Plate Rod Block which can be mounted in 8 different positions to best suit your rigging requirements.

The plate has been scaled down to be able to be better proportionally for the micro-sized batteries that have become increasingly popular. The Pro Battery Plate is backed by the KONDOR BLUE's exceptional lifetime warranty and customer support.
