- Dramatically improves the strength and reach of the FX6 EVF
- Ultra-smooth toolless operation
- Can be used with or without the NATO EVF Rail
- FX6 LCD Clamp: 130g/4.6 oz
- NATO EVF Rail: 62g/2.2 oz
- Dimensions: 75mm x 125mm x 45mm (W x T x D)

The KONDOR Blue Sony FX6 LCD Clamp is simple to install and use yet profound in the amount of stabilization it provides. It's a well-known and discussed fact that the FX9 Eyepiece Loupe is vastly superior to the loupe included with the Sony FX6. The challenge is that the FX6 EVF hinge is not strong enough to support the additional weight of the FX9 loupe. This clamp solves that issue.

Without tools, the LCD Clamp slips over the FX6 EVF monitor and hinge. The EVF rod clamp connects to the integrated rod clamp on the bracket. The bracket works with or without the NATO EVF Rail. The EVF Rail provides 360° rotation and 75mm of extension for optimizing your ideal eye alignment when rigged ENG style. If you're looking to use the Sony Eyepiece Loupe Assembly for PXW-FX9 with the Sony FX6, this FX6 LCD Clamp is a must.
