It is designed and optimized for use with Windows and can easily be connected to two PCs – one corded and another wireless – making it ideal to master two workstations.

Backlit and Battery powered

For the best adaptation to working in low-light environments the keys on Titan are backlit, and the illumination is dimmable in 5 levels. The Titan keyboard uses a long-lasting rechargeable lithium-ion battery for the wireless connectivity with state of the art battery life. If used without the backlight feature the Titan provides energy for months' use before recharge is necessary.
