[\[Download Images\] \(.zip file\)](#)

Features

- Ideal neck/shoulder strap for compact cameras with one connection area
- Fully adjustable from 43 to 63.5cm (17 to 25") using a unique locking slide to hold the desired posi
- Attaches to tight connection areas using a small cord loop (1.5mm) and mini quick disconnect
- Made in the USA

The Mini Loop Strap™ QD offers a large range of adjustability using a unique slide and includes a mini quick disconnect (QD) for added convenience. The mini quick disconnect enables the user to quickly remove their equipment in order to attach other OP/TECH USA's straps or to merely store the equipment away in a small pouch. It uses a loop-style attachment for cameras, binoculars or light meters with only one connection point.

Simply disconnect the mini QD, slide the small cord loop (1.5mm) through the connection area creating an opening large enough to loop through the remaining part of the mini QD. Once secured, simply reattach to the main body of the strap.

The Mini Loop Strap™ QD is adjustable from approximately 43 to 63.5cm (17 to 25"). It incorporates a unique locking slide that secures the strap in the proper position.

The Mini Loop Strap™ QD can be comfortably worn around the neck or shoulder. Give it a try!
