[\[Download Images\]](#) (.zip file)

Features

- Non-skid surface
- Uses Mini QD Loop™ for small camera connection area
- Compatible with other OP/TECH USA straps
- Made in the USA

OP/TECH USA's Compact Sling™ provides the unparalleled convenience of a shoulder sling for smaller point-and-shoot style cameras!

The low-profile neoprene shoulder pad features a nonskid surface which secures the pad on the shoulder while the camera freely glides up the strap into shooting position.

The OP/TECH USA Mini QD Loop™ connector attaches easily to the camera with a 1.5mm cord loop for tight connection areas and a sturdy 3/8" quick disconnect for easy attachment to the strap. The quick disconnect smoothly glides up and down the 3/8" nylon webbing strap to create the sling effect. The length is fully adjustable and has an additional plastic triglide which serves as a stop so that you can adjust where you want the camera to rest in the lowered position.

The Mini QD Loop™ is fully compatible with OP/TECH USA's Mini Loop Strap™ QD for a more traditional neck strap as well as the Cam Strap™ QD wrist strap and the Finger Cuff™ QD. This added versatility enables your gear to quickly change along with your ever-changing needs.

Experience the freedom and convenience of the most versatile strap system on the market today!
