Features

- Insta360 X4 Air Camera Cage
- Quick-Release Mechanism
- Versatile expansion
- Horizontal and Vertical Shooting
- Lens Protection
- The two-part cage structure, with twist-lock knob, enables fast and secure attachment and removal of the camera - vital for quick gear changes
- Features a rugged aluminium alloy frame, built-in rubber pads and silicone lens cover for reliable, uncompromising protection
- The contoured full-body design with precision cutouts for the battery, controls, mic ports, and signal transmission area—providing comprehensive protection while maintaining full camera access and signal performance
- Multiple mounting options let you shoot horizontally and add essential accessories like fill lights, and microphones for superior flexibility and creative freedom
- Retains the Insta360 quick-release mount and a 1/4"-20 threaded mount on the bottom for maximum compatibility

Durable Aluminium Build - Full-body Protection

Crafted from high strength aluminium alloy, the fully enclosed frame design provides robust impact resistance. Built-in rubber pads offer added cushioning, scratch resistance and enhanced protection.

Twist Lock Mechanism for Secure Assembly

The split frame structure and twist-lock knob mechanism ensure quick and stable assembly/disassembly, making it ideal for high frequency gear changes in fast paced shooting environments.

Tailored Fit with Full Access

Custom designed for the Insta360 X4 Air, the cage features precise cutouts for buttons, battery compartment and microphone ports, ensuring full access and operation. The open top design allows for uninterrupted signal transmission.

Versatile Mounting Options for Flexible, Creative Shooting

Side cold shoe mount accommodates horizontal shooting during high-intensity activities like cycling and surfing.

The cage is equipped with a 1/4"-20 threaded mount and lanyard hole to conveniently attach accessories like fill lights, microphones, and wrist straps.

Retains Insta360's quick-release base standard 1/4"-20 threaded mount on the bottom for mounting tripods, selfie sticks, stabilizers, and more.

Silicone Lens Cover for All-Round Protection

The form-fitting silicone lens cover reduces daily wear and tear risks while remaining lightweight and durable. Compatible with both Class-A and Class-S lens protectors

Wind Noise Out, Clarity In

Mic windscreen foam for the microphone port is included to effectively reduce wind noise during cycling and improve audio clarity.
