Features

- USB A - Lightning Cable 35cm
- Tailored for the connection between a drone's remote controller and your iPhone or iPad to control shooting with a bigger screen. With the adaptation of an authorized lightning chip it has a stable and safe transmission and power delivery. Quality electronics provide outstanding transmission performance
- A 35cm cable length precisely satisfies the need for connection between a drone's remote controller and your iPhone or iPad, providing optimum cable length
- The red housing is made of high-quality aluminium alloy. The nylon braided cable is highly tensile and durable.
- L-shaped lightning head designed for better handheld controller operation with the connection between mobile phone and remote controller
