Features

- USB A - Type-C Cable 35cm
- Tailored for the connection between a drone's remote controller and your mobile phone with a Type-C port to control shooting with a bigger screen. With the adaptation of a high-quality standard plug-in it has a stable and safe transmission and power delivery. Quality electronics provide outstanding transmission performance
- A 35cm cable length precisely satisfies the need for connection between a drone's remote controller and your phone, providing optimum cable length
- The red housing is made of high-quality aluminum alloy. The nylon braided cable is highly tensile and durable
- L-shaped lightning head designed for better handheld controller operation with the connection between mobile phone and remote controller
