Features

- Extendable Tripod suitable for all cameras, action cameras and mobile phones under 1kg
- Five shooting modes: Mantis mode, handheld mode, extension mode, tripod mode, and briefcase mode
- Innovative mantis mode unlocks more creative shooting angles
- Easily switch between tripod and handheld mode, selfie mode, and adjust tilt angles
- Ball-head gimbal enables 360° rotation and seamless switching between landscape and portrait mode
- CapLock system enables one-step installation, and the dual-lock design brings added security

The CapLock MantiPod Z is a versatile handheld extension tripod designed to meet the diverse needs of photography enthusiasts. It supports five shooting modes: Mantis mode, handheld mode, extension mode, tripod mode, and briefcase mode. With a 3-section folding design and ball head structure, it enables innovative shooting angles like selfie extension, elevated desktop shooting, vertical photography, and more. The PGYTECH CapLock system allows quick and efficient camera mounting for various devices, including action cameras, smartphones, and mirrorless cameras (≤1kg).

Ideal For A Range Of Scenarios

A versatile tripod that is extendable and has camera grip functions rolled into one, MantisPod Z is a great addition for all content creators.

Three-section Arm Enables Versatile Positioning

Featuring a 3-section arm, our MantisPod Z lets you easily position your camera at any angle for the perfect shot. And it can be extended to 540 mm long!

Five Shooting Modes Make You Shoot Like A Pro

Bring a wider range of shooting possibilities and extend your creativity to new heights.

- **Mantis Mode**
Suitable for recording unboxing and handicraft videos from an overhead view, or for outdoor vlogging.
- **Grip Mode**
A secure and comfortable grip for all-day shooting.
- **Extension Mode**
Easily switch between a traditional selfie and a perfect group shot.
- **Tripod Mode**
Provide a stable base for live streaming or time-lapse videos.
(Height range:185-480mm)
- **Briefcase Mode**
Capture the adorable moments of your furry friends.

Intuitive Operation and Flexible Interaction

- **PGYTECH Patented Action Camera Quick Release System**
PGYTECH patented action camera quick-release system lets you

mount/dismount your gear instantly instead of using a traditional knob, and the side security lock tightly fixes it in place.

- **Configured With An Action Camera QR Plate and 1/4" QR Plate**

Widely compatible with action cameras, smartphones and mirrorless cameras(≈1kg).

- **Pan-and-tilt Ball Head Brings Infinite Flexibility**

360° panning allows the camera to be moved smoothly in any direction.

86° tilting enables both horizontal and vertical shooting.

Human-centered Details Make Shooting A Breeze

- **Manual Twist Prevents Loosening**

All pivot points feature manual tightening mechanisms to keep your gear stable and secure during use.

- **Compact Enough To Be Portable**

As compact as 205mm, it can be easily stored in a camera bag for on-the-go use.

- **A Comfy and Handy Grip**

The non-slip grip is easy to hold for extended periods.

- **Comes With A Lanyard For Easy Carry**

The lanyard can be worn around the wrist to free your hands and prevent the gear from falling.

Note:

Mantis Mode can only be applied in the following situations:

- Ensure that the surface you hang it on is no more than 90mm thick.
- Ensure that the other two legs are supported to form a triangular structure.
- Avoid hanging it on moving vehicles, yachts, or other moving objects.

The product can bear a load of 1kg, while in extension mode, it can bear a load of 500g.
