MagCam Phone Grip - Grey

[\[Download Images\]](#) (.zip file)

Features

- MagCam Phone Grip
- **Modular Design**
The Bluetooth remote, charging grip, and stand modules can be detached and used independently
- **Quick Release Mechanism**
The grip and stand connect seamlessly with a slide-in design and can be quickly unlocked with one button
- **5W Wireless Charging**
The charging grip transfers power to the stand via PIN connectors, while the wireless charging coil powers the smartphone
- **Integrated Phone Stand**
When assembled, it can also be used as a desk phone stand during breaks. The phone can be rotated for landscape or portrait orientation
- **Eco-Friendly Coating-Free Material**
The exterior features a speckled visual effect achieved through a coating-free manufacturing process

Magnetic Wireless Charging Module

- **EDC-Friendly Design**

At just 3.5mm thick (5.5mm at its thickest point) and weighing 48g, the stand features rounded edges for comfort and minimizes bulk when attached to the phone

- **Dual-Sided Magnetic Compatibility**
- **Landscape & Portrait Stand Functionality**<br
- A metal stand supports angles up to 58°, suitable for iPhone 12 series and newer devices in both orientations

Charging Grip Module

- **Power Bank Functionality**
Equipped with a built-in 3000mAh 18650 battery, the grip includes a Type-C port that functions as both a charging and output port, delivering 10W power output. Users can directly connect a cable to charge their phone
- **Lanyard Hole Design**
The bottom of the grip features a lanyard hole, allowing users to attach a wrist strap of their choice or use the included basic strap for added convenience
- **Anti-Slip Grip**
The front of the grip is wrapped in high-quality faux leather, offering an elegant appearance and a secure, non-slip grip
- **Locking Indicator with Warning Color**
The quick-release interface is secured with a sliding latch, featuring an orange warning indicator. When the orange is fully visible, it confirms that the grip is securely attached
- **Camera-Like Ergonomic Design**
The grip is designed to mimic the ergonomic feel of a camera grip, providing users with a comfortable, professional shooting experience

Bluetooth Remote Module

- **Versatile Bluetooth Control Functions**
Android Phones: One-click camera launch, half-press to focus, press to capture, long-press for burst shots, toggle between photo/video modes, switch front/rear cameras, and adjust focal length.
iPhones: Half-press to focus, press to capture, long-press to switch to video mode, switch front/rear cameras, and adjust focal length
- **Bluetooth Memory & Reset**
Reconnects automatically to previously paired devices when powered on. To pair with a new device, hold both the Bluetooth pairing button and the mode-switch button to clear the memory
- **Long Battery Life**
While wirelessly charging the phone, the grip also charges the Bluetooth remote. With a 12-hour standby time, the remote is always ready for use

- **Magnetic Attachment**

Built-in magnets enable quick and secure attachment to the grip, making it easy to attach and detach

- **10-Meter Bluetooth Control Range**

Supports a control range of up to 10 meters, providing flexibility for remote photography

The MagCam Phone Grip is a versatile modular grip designed for smartphone photography enthusiasts, delivering a camera-level shooting experience.

Through a quick-release mechanism, it can be separated into three parts: Magnetic Wireless Charging Module/Bluetooth Remote Module/Charging Grip Module.

Once detached, the wireless charging module functions as a desktop EDC stand, adjustable up to a 58° angle, supporting most smartphones in both portrait and landscape modes. The module is ultra-slim, with a maximum thickness of 5.5mm and an overall thickness of 3.5mm, ensuring a comfortable and unobtrusive grip experience.

The charging grip module features a 3000mAh battery and thus can be used as a power bank. It can transmit 5W of power via POGO pins to the magnetic module for wirelessly charging your phone, or output 10W of power through a Type-C port for wired charging. While wirelessly charging the phone, the charging grip also powers the magnetic Bluetooth remote module on top through an additional POGO pin connection.

The Bluetooth remote control uses a magnetic attachment design and supports 10-meter remote operation. It is compatible with both Android and iOS systems, with specific functions detailed in the compatibility list when connected to Android or Apple devices.

The MagCam phone grip attaches to the back of the phone using built-in magnets. Android phones can use a magnetic ring adapter for compatibility. The grip features dual-sided magnetic design, allowing a magnetic fill light to be stacked on the opposite side. Besides, the base includes a lanyard hole for wrist strap attachment and a 1/4" threaded hole for tripod or other accessory mounting.

In the box:

- 1x Magnetic Wireless Charging Module
- 1x Charging Grip Module (W/ Remote Module)
- 1x Magnetic Ring
- 1x Lanyard
- 1x User Guide
- 1x Logo Sticker
- 1x Marketing Card
