Passport scanning and data extraction solution

The Plustek SecureScan X Series is a fast and easy way to scan passports and ID cards Compact design for one-step scanning to capture and extract passport information

SecureScan X Series Simplifies Passport Scanning and Data Extraction

- **Fast**
Scanning takes about 1 second per side
Passports and IDs are automatically detected and captured
There is no need to press any buttons or click on screens
- **Data Capture**
Capture multiple high resolution images under different illuminations automatically once placed on the scanner
*RFID feature available only on SecureScan X200 model

Compatible

Compliant with ICAO Doc 9303 standard for machine readable travel documents and supports TD1/TD2/MRP/MRV sized document scanning.

Capable of Reading Machine Readable Zone and Visual Inspection Zone Data*

SecureScan X Series can capture and verify relevant data of all international passports, plastic ID cards and other documents.

*All Visual Inspection Zone (VIZ) requires customization. Applicable fees may apply, please contact Plustek for more info.

1-Second Quick Scan with Data Output

SecureScan X Series only takes approximately 1 second from scanning to showing on screen. Our built-in data recognition helps to read and input the customers profile data more accurately.

*All Visual Inspection Zone (VIZ) requires customization. Applicable fees may apply, please contact Plustek for more info.

SDKs Available

The following SDKs are available to integrate the SecureScan X Series into your application

- Passport/MRZ SDK
- Driver's License & State issued ID card SDK
- RFID & OCR Library SDKs
- Scanning & Image Enhancement SDK

Customized SDK licensing terms are determined by the region and may involve relevant charges tailored to the particular recognition reading needs.
