

Samyang VDSLR 14mm T3.1 MK2 EF

ProdCode: SAMYANG8818

Manual focus, full frame, ultra wide-angle cine lens - Canon EF Mount

[\[Download Images\]](#) (.zip file)

Features

- Manual focus, full frame, ultra wide-angle cine lens
- Full-frame coverage and is optimised for use on video, DSLR and mirrorless cameras
- All models in the VDSLR MK2 range have unified focus and aperture gear ring positions
- Weather-sealing now protects the most vulnerable gap between the lens and camera mount, to prevent dust, light rain and snow from penetrating

The Samyang VDSLR 14mm T3.1 MK2 is a compact, high quality, fast prime cine lens, available in several mounts. It has full-frame coverage and is optimised for use on video, DSLR and mirrorless cameras.

Whether this is your first dedicated cine lens or you are simply looking for amazing performance from compact glass, the MK2 version inherits the superb optics and build quality from the previous model, but has several added features for enhanced performance and handling.

All models in the VDSLR MK2 range have unified focus and aperture gear ring positions. This allows for easy changing of lenses without having to adjust follow-focus systems and rigs. For added convenience and professional usage, focus scales, apertures and focal lengths are visible on both sides of the lenses.

The new 9-bladed aperture delivers smooth and circular bokeh, which adds a three dimensional quality to the subject and pleasing out-of-focus effects. An 18-ray starburst highlight effect can also be created by stopping down to small apertures.

Weather-sealing now protects the most vulnerable gap between the lens and camera mount, to prevent dust, light rain and snow from penetrating. It provides the ability and confidence to capture stunning images in less than perfect conditions.

Due their compact dimensions and light weight, Samyang VDSLR MK2 lenses are ideal for use handheld, with gimbal, on car mounts and drones. They offer an ideal way to experience the quality of genuine cine lenses on a low budget, for high quality video making. They are especially popular with YouTubers.
