Carbon fibre tripod legs with four twist lock leg sections

[\[Download Images\]](#) (.zip file)

Features

- Carbon fibre tripod legs with four twist lock leg sections
- **Head mounting screw**
Corresponding to both U1/4 and U3/8 head mounting screws
- **3-steps leg angle adjustment**
Leg angle adjustable from a high position to a low position
- **A.R.S (Anti-Rotation System)**
The A.R.S. systems prevent the leg tubes from rotating inside each other making it much easier to lock and release all the twist-release locks securely
- **Leg lock system (crown-type) (PAT.)**
Twist lock system with double nut ring crown type (PAT.)
- **The hook at the bottom of the center column**
Spring loaded accessory hook capable of suspending a weight

A very compact carbon fibre tripod, the Slik PRO CF-634 is for those who don't need a full sized tripod but want something to hold their camera still in a wide variety of situations. The SLIK PRO CF-634 is extremely lightweight. It has four short leg sections extending to nearly 1.6m and folding down to 45cm for carrying and storage. Most noteworthy, the SLIK PRO CF-634 weighs only 930g, but supports loads up to 3kgs., making it a great choice for travel. Use it in situations where a full-sized tripod would not be needed or convenient to carry.

All 600 series carbon fibre tripods have legs made up of carbon fibre material that is actually comprised of 8 layers of inter-woven carbon strands that are then bonded together in a sealed, high-pressure furnace producing strong, light weight carbon fibre. The legs also feature A.R.S (Anti-Rotational System) is designed into the leg locks and do not allow the individual legs sections to rotate inside each other. Each leg also has an independent lock that sets in one of 3 angles to vary the height and stance of the tripod. The three settings are for maximum height, waist level or low angle photography close to the ground.

The four leg sections are secured and loosened with twist locks. Because the legs are non-rotating, you can unlock all of a leg's stages at once by twisting the three large rubber grips with one hand. This enables fast setup.

In the box:

- Slik CF-634 tripod (legs only)
- Carrying case

Specifications

- **Closed Length:** 475mm
- **Leg Lock Type:** Twist Lock
- **Leg Sections:** 4
- **Maximum Height:** 1,590mm
- **Minimum Height:** 105mm
- **Weight:** 930g
