

SLIK MONOPOD 350

ProdCode: SLI3449

Lightweight monopod with 4 lever lock leg sections

[\[Download Images\]](#) (.zip file)

Features

- Lightweight monopod with 4 lever lock leg sections
- Each leg section is secured with a quick-locking lever for speedy setup
- Can be used with cameras or spotting scopes that use the standard 1/4" tripod thread
- An insulated, soft neoprene grip makes for comfortable handling in cold weather and there is a non-slip rubber foot

The SLIK MONOPOD 350 is a super lightweight general use monopod.

It has a soft padded grip for stability and grooved tubular legs for added rigidity. The lightweight aluminum leg sections have an indented groove preventing individual sections from turning during set-up or folding down. In addition, the speed release leg locks make set-up and take down fast and easy.

Designed for lighter weight DSLRs, mirrorless interchangeable lens camera (ILC) and compact cameras. The monopod extends to 1,600mm tall and weighs only 350g before adding a ball head. The legs retract to a compact 510mm.
