# Sonnet MacCuff Mini 2

**ProdCode: SONCUFFMINLH2**

The Ultimate Security Mount for locking your Mac Mini

[Download Images] (.zip file)

## Features

- **Secures Your Mac mini to the Back of a Monitor** - Mounts to your display's extra VESA mounting holes (VESA 75 and 100 patterns supported) with included screws
- **Secures Your Mac mini Under or On a Desk or Table, or Even On a Wall** - Simple installation using included drill template and included screws
- **Heavy-Gauge Steel Design with a Refined Finish** - Prevents scratches while protecting your computer
- **Provides Wraparound, Pry-Resistant Security** - With the included steel locking bar[2] installed and your padlock attached, your computer is secured on all sides
- **Kensington Lock Compatible** - Includes Kensington Security Slot on locking bar
- **Simple Installation** - Includes concise documentation
- **Includes 35 cm (14 inch) HDMI Monitor Cable** - Reduces cable clutter when MacCuff mini 2 attached to the back of your monitor
- **Offers Simple Cable Management** - Enables you to secure power cord and other cables; prevents accidental unplugging

## Mac Compatibility

- Mac mini [mid 2010 (4,1) through early 2020 (current)]
- Apple® Airport Time Capsule® (first-fourth generation; early 2008-mid 2011 square, low-profile models)

**Technical Notes**

1. The included locking bar is intended for use as a theft deterrent and will provide added security ONLY when used with a lock (sold separately).
2. Not compatible with monitors that attach their monitor stands to the monitor using the VESA holes.

**Versatile and Secure Mounting for Mac mini**

Move your Mac mini off the desktop! Sonnet's MacCuff™ mini 2 security mounting bracket frees up space by attaching your computer to the back of a display—or to a desk, shelf, or wall—while allowing full access to its ports and power switch. Attached on the back of a display using its extra VESA mounting holes[1] (four holes in a square pattern), the MacCuff mini 2 securely holds your Mac mini in place.

Placed on the back of a display, your computer disappears leaving only cables to hide - Sonnet includes a special 35cm (14-inch) short HDMI monitor cable to simplify that task. MacCuff mini 2 also supports simple cable management to help tame cable clutter.

**Where to Mount**

Many displays include extra VESA mounting holes (four holes in a square pattern), perfect for attaching a MacCuff mini 2.

**Heavy Duty, Light Touch**

Constructed of heavy-gauge steel, MacCuff mini 2 firmly holds your Mac mini in place, yet delivers a light touch—its refined double powder-coated finish won't scuff or scratch the computer.

**Wraparound Security**

Unlike cheap brackets that merely hold a computer in place, or others that provide minimal protection, MacCuff mini 2 is pry-resistant and provides theft deterrence all around.

**Lock It Up**

With the included steel locking bar[2] installed and your padlock (sold separately) attached, MacCuff mini 2 is resistant and secures your computer on all sides.

**Kensington Lock Ready**

Secure the Mac mini and the monitor with one Kensington® lock!

**Easy Installation**

MacCuff mini 2 installation is simple. Sonnet provides easy-to-follow instructions (in case you actually need them), and the necessary hardware to secure the bracket. For back-of-monitor mounting, just use the four supplied machine screws. For under-desk, tabletop, or wall mounting, simply tape the included drill hole guide to the surface, drill pilot holes, and then secure MacCuff mini 2 using the four supplied wood screws.

**In the box:**

- 1x MacCuff mini 2 Bracket
- 1x Locking bar[1]
- 1x 35cm (14") HDMI cable
- 4x wood screws
- 4x machine screws
- 2x cable ties
- Documentation with drill template
