- Weight: 0.65 lbs. (0.29 kg)

Flexible and Secure Mounting

Sonnet MacCuff mini (2024+) security mounting bracket attaches your 2024 Mac mini® under a desk or shelf, to a wall, or to the back of a monitor, freeing up space on your desktop while allowing unimpeded access to the computer's ports and power switch.

Wraparound Security without Barriers to Operation

Unlike other products that merely hold a Mac mini in place — or others that provide minimal protection — MacCuff mini is pry-resistant and provides theft deterrence all around. A pry-resistant security ridge, a cutout for the computer's base, and steel locking bar wrap your Mac mini without interfering with its operation.

Lock It Up – Safely Secure Your Mac mini

MacCuff mini (2024+) supports the use of a padlock (sold separately) to secure your Mac mini — you hold the key (or combination)! The included steel locking bar secures to the bracket with your padlock.

- Simple Security – Supplied Nut and Bolt
  A nut and bolt are provided to hold the locking bar to the bracket, keeping your Mac mini protected from somebody simply walking up and taking it.
- Best Security – Your Padlock
  MacCuff mini (2024+) supports the use of a padlock (sold separately) to secure your Mac mini — you hold the key (or combination)!

Straightforward Installation

Under Desk, Table, or on a Wall

Sonnet provides simple instructions and the necessary hardware to secure the bracket. For under-desk or table-top mounting, simply tape the included drill hole guide to the surface you're attaching the bracket, drill pilot holes, and then secure MacCuff mini using the four supplied wood screws. For wall mounting, tape the drill hole template to the wall, drill holes through the wall, install the included drywall anchors in the holes as necessary, and then secure the MacCuff mini using the four supplied drywall screws.

Back of a Monitor

Some monitors include extra VESA 75 or 100 pattern mounting holes on the back, ideal for attaching MacCuff mini with included M4 flathead screws to make your mini disappear.

Heavy Duty Construction. Gentle Touch.

Like the Sonnet MacCuff Studio bracket for Mac Studio® computers, MacCuff mini (2024+) is constructed of heavy-gauge steel to firmly hold your Mac mini in place yet delivers a light touch — its refined double powder-coated finish protects the computer. Sonnet designed MacCuff mini (2024+) to secure your computer without blocking its ventilation and allows you to connect cables without having to worry whether they will fit. Its design also supports robust WiFi and Bluetooth operation, ideal for all your wireless connections.

Keep Your Cables Organized with Cable Management

MacCuff mini (2024+) includes an adhesive-backed cable management clip that enables you to route and secure multiple cables the way that best suits your needs. The clip adheres to MacCuff mini, holds cables securely, allows you to open and close it to move (or remove) cables as necessary, and can be removed without damage to the surface it's adhered to.

In the box:

- MacCuff mini (2024+) Mounting Bracket
- Locking bar
- Nut and bolt (to retain locking bar)
- Four wood screws
- Four M4 screws to attach to monitor
- Four drywall anchors
- Adhesive-backed cable organizer clip
- Documentation with drill template.
