Dual Assignable HDMI Outputs

Allowing You to Output Different Video Feeds(Preview, Multiview or Program) Simultaneously.

Bigger than ever | Brighter than ever | Smoother than ever

- **More Space to Explore**

The all-new 11.2-inch OLED screen brings a larger, more immersive display, redefining how you see and interact with content.

- **Shine in Any Light**

With a peak brightness of up to 800-1,000 nits, every detail remains vivid and clear, even under direct sunlight.

- **Effortlessly Responsive**

Enjoy ultra-fast touch feedback for a silky-smooth experience, making every interaction seamless and intuitive.

Configure directly & Intuitively from YoloBox

The benchmark for performance, ease of use.

- **Live Switch**

Easily switch between multiple video sources or fully customized scenes with a touch.

- **Audio Mixing**

Built-in audio mixer with easy setup. Individual level control of multiple audio sources.

- **ISO Recording**

Capture all the video inputs as well as the program video and save them separately.

- **Graphic Overlays**

Add logos, lower thirds, titles, countdown timer and more to look professional.

- **MultiViews**

Customize live stream layout with built-in multiviews and level up production with ease.

- **Scoreboard**

YoloBox's built-in scoreboards allow you to keep the score in real-time, display game progress, add game/team logos, and more.

- **MultiCam Replay**

Create highlight clips with preset video duration, intros, outro and more with a few clicks.

- **Inviting Guests**

Create a real-time conversation with remote guests from a web browser on mobile devices.

- **PTZ Control**

With PTZ control, you can preset up to 5 camera positions. This allows you to quickly switch between different angles and views.

- **Crop Video**

Video cropping serves various needs such as margin removal, game capture resizing, conferencing zooming, and close-up view creation.

- **Chroma Key**

Seamlessly add a different background of a design or a different location for your live productions with the magic of chroma key in a few taps.

- **AutoSwitch**

Seamless Transition between pre-set camera angles with defined order and duration. Frees you from manual camera control to focus on the video.

Advanced Features as Standard

- Free MultiStreaming
- Customized MultiView Out
- 4K Streaming
- App/Web Control Control
- Inviting Guests
- Web URL Overlay
- Video Follow Audio
- Custom Layouts(Scene Building)

Audio Investment Evolved

- **Assignable AFV**

Each audio channel automatically switches as the video changes, ensuring perfect synchronization.

- **Mix Minus**

Easily solo monitor a specific audio channel or mute it entirely, giving you full control.

- **Audio Delay**

For any sync issues between audio and video, simply adjust the timing to ensure synchronization.
